12 Best Energy ETFs: Top Oil, Gas and Renewable Energy Funds

.... Clean energy investment has received a significant boost due to the COVID-19 recovery and the global energy crisis. *The International Energy Agency* estimates that around \$2.8 trillion will be invested in energy in 2023. More than \$1.7 trillion is going to clean energy, with solar being the top performer, and low-emissions power is expected to make up almost 90% of total investment in electricity generation. The ratio of spending on clean energy versus fossil fuels has shifted to \$1.7 spent on clean energy for every \$1 spent on fossil fuels, a notable
